Document Overview

What You Will Find in This Manual

- The data structure of the Company Relationships package, including a schema, tables, and all other tangible components of the data
- The relationship of Company Relationships to the S&P Capital IQ Base Files and Transactions packages
- Common ways of querying the Company Relationships packages with SQL examples

Who Should Read This Manual

This manual is for use by Xpressfeed clients utilizing the Loader and those who are directly downloading the files from the FTP server and writing their own loading procedures.

The Xpressfeed Loader generates a database schema and structure and loads Company Relationships as a set of fully indexed tables. The Loader includes functionality to automate the daily updates of Company Relationships and, thus, keep your database up to date.

Supporting Documentation

- *Xpressfeed Loader User Guide*, which outlines the features and capabilities of the Xpressfeed Loader.
- *S&P Capital IQ Base Files User Guide*, which describes the type of data included in the Base files, the data structure of the Base Files and all other tangible components of the data, as well as integration of Base Files with other S&P Capital IQ data sets.
- *Transactions User Guide*, which describes the Transactions package that links directly to the Company Relationships package.

Executive Summary

The S&P Capital IQ Company Relationships package is a global database of all relationships that exist between companies in the S&P Capital IQ universe. Relationship types include acquisitions, investments, investment arms, lenders, affiliates, index providers, and more. The relationship is categorized as current, prior, pending or cancelled. [For a full list of relationship types, see Table 3.](#)

The Company Relationships package can be used to build a corporate family tree, determine the ultimate parent of a company, identify private equity sponsors, find current and prior investors in a company, and for many other uses.¹

Collection and Coverage

S&P Capital IQ Company Relationships are collected and made available on a global basis. Sources include thousands of newspapers, trade publications, news aggregators, company filings and websites. In addition, all private equity sponsors are contacted at least once a year in an effort to have their records reviewed for accuracy and to obtain other information that may not be publicly available. The collection team is constantly expanding company relationships coverage based on client requests and processed transactions. Historical coverage for **prior** company relationships starts in the year 2000.

¹ Company Relationships also links to the Transactions package to define relationships for Merger/Acquisitions, Private Placements, Spin-offs, and other transactions. For more information on the Transactions package and how they link, see the *Transactions User Guide*.

Company Relationships Schema

The S&P Capital IQ Transactions database schema is normalized to eliminate data inconsistency and redundancy. Primary keys appear in bold font and are designated with the initials PK. All schemas reflect Xpressfeed Loader table names. The associated file name for Non-Xpressfeed Loader clients is given in parentheses beneath each table.

The Company Relationships schema is composed of two tables representing the **Company Relationship** and the **Company Relationship Type**.

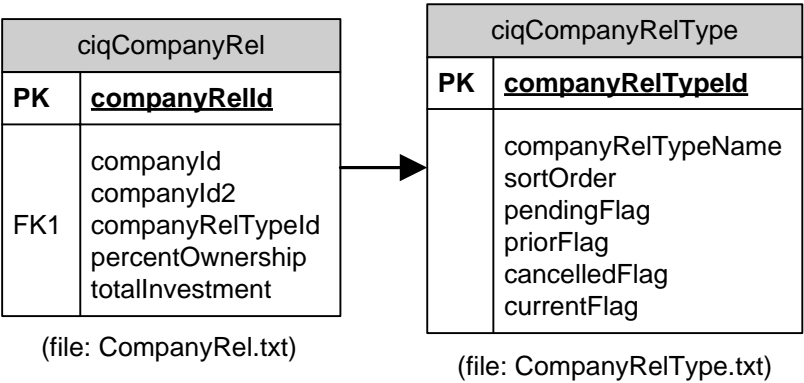

Figure 1. S&P Capital IQ Company Relationships Database Schema

Linking to S&P Capital IQ Base Files

Basic Company

The Basic Company File contains the company name, the *companyId*, primary ticker symbol, exchange, address information, company type, and year founded. The *companyId* is used in Company Relationships and in all other S&P Capital IQ data sets to associate companies to items of S&P Capital IQ content. The **ciqCompanyRel** table has both a *companyId* and *companyId2* which link to the Basic Company File.

More Information

For a more detailed discussion of the Base Files, please refer to the *S&P Capital IQ Base Files User Guide*.

Table Descriptions

This section contains a description of each table and table field in the Company Relationships schema.

Company Relationships Table

The **Company Relationships** table provides all company relationships according to parent company (*companyId*), child company (*companyId2*) and company relationship type.

ciqCompanyRel	
PK	<u>companyRelId</u>
FK1	companyId companyId2 companyRelTypeId percentOwnership totalInvestment

(file: CompanyRel.txt)

Table 1. Company Relationships fields

Column Name	Data Type	Comments
companyRelId	int	Unique identifier of the company relationship
companyId	int	The parent company involved in the relationship
companyId2	int	The child company involved in the relationship
companyRelTypeId	int	Unique identifier of the relationship type

percentOwnership	decimal(18,4)	Percentage stake the parent company has in the child company, if applicable to the relationship. If the relationship is a prior relationship, this is the percentage stake at the time of the relationship.
totalInvestment	decimal(18,4)	Total investment, in millions of USD, that the parent company invested in the child company at the time the relationship was enacted (this is only given if applicable to the relationship).

Company Relationship Type Table

Company Relationship Type is a reference table that provides the textual description of the company relationship type, including whether it is a current, prior, pending or cancelled relationship.

ciqCompanyRelType	
PK	<u>companyRelTypeId</u>
	companyRelTypeName sortOrder pendingFlag priorFlag cancelledFlag currentFlag

(file: CompanyRelType.txt)

Table 2. Company Relationship Type fields

Column Name	Data Type	Comments
companyRelTypeId	int	Unique identifier of the company relationship type
companyRelTypeName	varchar(50)	Description of the relationship the child company has to the parent company. The pattern for this type begins with "Current", "Pending," "Prior," or "Cancelled" and ends with the type of relationship. For example, "Current Investment" indicates the child company is a current investment of the parent company. A full list of relationship types are given in Table 3.
sortOrder	int	Order the ciqCompanyRelType table by <i>sortOrder</i> , to group relationship types according to the last part of the relationship type name (Investment, Investment Arm, Affiliate, etc.)

Column Name	Data Type	Comments
pendingFlag	bit	Flag indicating the relationship is pending (1 if pending).
priorFlag	bit	Flag indicating a past relationship (1 if prior).
cancelledFlag	bit	Flag indicating the relationship was cancelled (1 if cancelled).
currentFlag	bit	Flag indicating the relationship is a currently active relationship (1 if current).

Table 3. All Company Relationship Types (by sortOrder)

companyRelTypeId	companyRelTypeName
25	Pending Acquisition/Investment
1	Current Investment
2	Prior Investment
26	Cancelled Acquisition/Investment
5	Current Subsidiary/Operating Unit *
6	Prior Subsidiary/Operating Unit *
7	Merged Entity
9	Current Investment Arm
12	Prior Investment Arm
10	Current Affiliate
24	Prior Affiliate
11	Current Fund Investor
19	Prior Fund Investor
37	Cancelled Fund Investor
14	Prior Auditor
16	Prior Legal
17	Current Fund Sponsor
23	Prior Fund Sponsor
20	Current Investment Group
21	Prior Investment Group
22	Fund Family Member
31	Current Lender
32	Prior Lender
40	Current Index Provider
41	Prior Index Provider
33	Previous Version
34	Current Fund Investment Advisor
35	Prior Fund Investment Advisor
42	Pending Lender
43	Cancelled Lender
38	Current Affiliated Government Institution
39	Prior Affiliated Government Institution

* Note that subsidiaries are determined by the parent owning more than 50% equity in the child company. Otherwise the child company is considered an investment.

Appendix A: Sample Query Solutions

This section provides sample queries and solutions for S&P Capital IQ Company Relationships. All sample queries use SQL Server script.

For queries where the Transactions package is used with Company Relationships, refer to the Sample Query Solutions in the *S&P Capital IQ Transactions User Guide*.
